Rectorseal Pulling Heads Available

- * Single Use
- * Made of Steel
- * Won't fail like aluminum
- * Eliminates setup time

INNOVATIVE PRODUCTS

Sequential Foot Marks - Every foot is sequentially marked. It provides accurate footage beginning at zero at the bottom of the reel and ends with the finished length at the top of each reel.

Self Lubricated Wire - Eliminates the material and labor for lubricating the wire and eliminating messy clean-up further reducing cost.

Since its humble beginnings in a 3000 sq ft warehouse in 1982, Republic Wire has grown to over 400,000 sq ft and continues to grow. Republic Wire was founded on the principals of service for our customers. Hard work, customer loyalty and the ability to manufacture a quality product are Republic Wire's key ingredients for success.

Republic Wire is proud to say that all of our Copper Wire products are manufactured in the USA.
