## SAFETY CAPS FOR ELECTRICAL CONDUIT

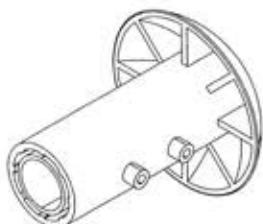

Highly visible safety yellow cap made of premium grade polypropylene.

**ProCap Inc.**

ProCap electrical conduit safety caps used in conjunction with vertical rises of metal conduit to help maintain a safe workplace.

Patent pending ProCap Safety Cap is an OSHA compliant safety device used to minimize impalement of falling workers from a height.

### Materials

ProCap conduit safety caps are constructed of high quality polypropylene

### Product Sizes

EMT Mushroom cap available in 1/2" 3/4" 1"

*Additional sizes can be manufactured with a volume commitment.*

### ADVANTAGES

- Saves electrical contractors from expensive workmen's comp claims.
- Provides visual warning to help prevent trip hazards. Gray pipe, gray duct tape and gray concrete is a liability waiting to happen.
- Secure waterproof cap protects the conduit from moisture and objects.

### INSTALLATION

- Place onto the end of a protruding metal conduit.
- Apply force onto the cap face until the cap is seated firmly on to the conduit.
- Use a Philips screwdriver to engage the two patented set screws on the shaft of the ProCap to the conduit. ProCap is now secured until you take it off.
